Its experts in every department are active to remedy any defects of the past and to take advantage of all that has been gleaned in the only true school in which this knowledge may be obtained, by observing through our experts in Europe all that may be arned from actual war. As you look abroad, you see the foundation of all old theories crumbling every day. If war upon the land has reverted to the bayonet and the hand grenade, war upon the sea has leaped forward at a single stride of ancient convention. With what weapons, by what strategy shall we meet the terror of the submarine, the still unrevealed possibilities of the airship? It is to you gentlemen, that this question must be that the old way is no longer the right way, or that the new way points the aside what have proved to be mere shackles of convention and daringly to go forward. Though all of the had disappeared. cases, after careful medical examination, showed none of the symptoms of disease, it is not claimed by Dr. Silas P. Beeche of New York, one of the originators of the treatment, that it is a cure. To satisfy all doubt, a space of several years must elapse to prove there is no recurrence of the cancer. Thus far only inoperable or milignant cancers, those which it would be dangerous to attack with the trute have here the subject of the direct inoculation of the growth by the injection of a preparation discovered by Dr. Beeche and one of his assistants. The exact nature of the preparation has not yet been disclosed, was an immediate and remarkable improvement noted. Anaemia disappeared in a few days, the complexion becoming more or less rosy. The desire and craving or less rosy. The desire and cray for morphine, with which cancer tients are treated for the relief of the pain, was lost. The patients all pick-ed up in weight. Their general appearance was very much improved One of the most remarkable cases shown was that of Mrs. James A. Hoboker of 241 Grand street, who had been afflicted with malignant cancer of the breast, the most virulent given up as uncurable by surgeons for operating was impossible. She put herself in the hands of Dr. Beveridge, at the Poloyclinic hospital. Today, after three months' treatment a trace of the growth was visi-

bassador von Bernstorff sent Dr. Meyer-Gerhard. It was explained that Dr. Meyer-Gerhard was here in connection with Red Cross work. As soon as the emissary was well out of the country, the Tribune printed a story to the effect that instead of being connected with the Red Cross, he had been here as an agent of the German government in the purchase of war munitions, and that his real name was Dr. Alfred Meyer. The story went the rounds without delay, and the president was very much annoyed, for if it were true, von Bernstorff had been guilty of very bad faith. The German ambassador saw proper to deny the story; but it would not down, until finally the Tribune announced that it was mistaken. As to whether the Tribune was honestly mistaken, or it deliberately started its canard in the hope of making trouble, is a matter of opinion.

In his recent address before the

raduating class of Winthrop college, a well-thought out and carefully prepared deliverance by the way, Congressman Lever devoted himself almost solely to the subject of lightening the work of women, especially on the farm. He pointed out how the lot of the farm woman was very nearly the same as it has been for generations, and how man, although finding no difficulty in realizing the necessity for labor-saving machinery of all by time." kinds and generally finding a way to procure such machinery for themselves, are slow to appreciate the importance of the same need in the case of the women. Among other things, average farm wife has to lift water of last year. to the aggregate of from 2,000 to 3,000 pounds a day, year in and year out, when this drudgery could be obviated by an expenditure of from \$100 to \$250, and he shows also that in most country homes there is a woeful lack of all other conveniences, almost the same as fifty or a hundred years ago. The address generally is in the nature of an appeal for more conveniences in the home, a lighter, happier and more pleasant lot for the wife and daughters in the interest of more enjoyment, larger contentment and higher appreciation of life generally. It would not be correct or fair to say that there is a great deal in Mr. Lever's address that is new; but we are free to declare that we have never seen the case presented with more power and force, and we are willing to predict that among the bright, intelligent, highly educated young ladies who heard that address, there are many who will take the lesson to heart and develop in their homes in practical way.

England's Army.

The American Magazine for July contains an article about Kitchener's volunteer army which, if true, gives good ground for caution in discounting the probable outcome of this summer's campaign in France.

The article in question is by J. Herbert Ducworth, an English newspaper man, who remained in England from the beginning of the war until about a month ago, and who claims to have known all along what he is now telling; but that he kept his information to himself because of the tremendous military importance thereof

Ducworth's story is to the effect that although Lord Kitchener had all along been pretending to be trying to raise an army of only one million in England.

In considerable detail the article asking for a million men, how the response was prompt and overwhelmfactorily it would be necessary to ask for conscription laws. There was no immediate increase in the number of steadily swelled to four or five times its proper numerical strength.
